# What is AttachmentSecurity for Microsoft Outlook?

AttachmentSecurity for Microsoft Outlook is a free and simple software add-in utility that allows you select and manage which file attachment types to block and unblock in your Microsoft Outlook emails.

Each person wishing to select which file types to block and unblock using AttachmentSecurity for Outlook must have a copy of Microsoft Outlook 2000, XP or 2003. AttachmentSecurity does not work with Microsoft Outlook Express, which is a different product from Microsoft Corporation.

Once AttachmentSecurity for Microsoft Outlook is installed and registered, you will see that a new program has been added to your machine. The simple interface for AttachmentSecurity for Outlook only consists of one main dialog box, shown below.

Nothing changes in the way you use Outlook after AttachmentSecurity for Microsoft Outlook is installed. You can send and receive emails in exactly the same way it was before AttachmentSecurity for Outlook was installed. The only difference is you will now have the ability to select which file attachment types you receive in Microsoft Outlook.

## AttachmentSecurity for Microsoft Outlook Installation **Overview**

AttachmentSecurity for Outlook is a free Microsoft Outlook add-in that becomes part of your Microsoft Outlook program. The AttachmentSecurity dialog box allows you to specify exactly which file types to block and unblock in your Microsoft Outlook email attachments.

### The three basic steps to setting up AttachmentSecurity for Microsoft Outlook are:

#### 1. Download AttachmentSecurity for Microsoft Outlook

Download your free copy of AttachmentSecurity for Outlook from our website at http://www.attachmentsecurity.com/downloads.htm.

#### 2. Install the AttachmentSecurity for Microsoft Outlook add-in software

The second thing you'll need to do is install the AttachmentSecurity for Outlook add-in software. You must already have Microsoft Outlook 2000, XP or 2003 installed to run and install AttachmentSecurity for Outlook.

#### 3. Register your copy of AttachmentSecurity for Microsoft Outlook

Once you've installed AttachmentSecurity for Outlook, you will need to register your information in order to receive your registration code for AttachmentSecurity for Outlook. This information will be processed and solely kept by Lookout Software, LLC; it will not be shared or sold for any other purpose. If you choose not to register, the program's functions will work properly but you will see a pop-up message every time Microsoft Outlook is opened.

# **Registering AttachmentSecurity for Microsoft Outlook**

Once you have installed AttachmentSecurity for Microsoft Outlook, you will need to fully register your copy of AttachmentSecurity for Outlook.

The first time you open Microsoft Outlook after installing AttachmentSecurity for Outlook:

- 1. A pop-up dialog box from AttachmentSecurity for Outlook will appear, notifying you that the program has not been registered. This is because you have either not registered your information to receive the registration code, or you have not entered your registration code sent to you by email after you registered.
- 2. If you have not registered your information and would like to do so in order to receive your registration code, click on **Register Now!** and follow the steps below. If you received your registration code and need to enter it into your copy of AttachmentSecurity for Microsoft Outlook, click **Enter Registration Key** and proceed to step 6 (*page 13*). If you do not wish to register your information or enter in your registration code right now, you can click on **Register Later** and proceed to the section "Using AttachmentSecurity for Microsoft Outlook" (*page 15*).

Quick Tip
If you choose to not fully register your copy of AttachmentSecurity for Microsoft Outlook, you will continue to see the AttachmentSecurity registration pop-up message every time Microsoft Outlook is opened. Although AttachmentSecurity will still function normally, there is no way to prevent this message from appearing.
However, you may register and enter in the registration code at any time. Once AttachmentSecurity for Microsoft Outlook is registered, you will no longer see the registration pop-up message.

# Using AttachmentSecurity for Microsoft Outlook

Once you have installed and registered AttachmentSecurity for Outlook, you can begin selecting which types of file attachments to block and unblock within your copy of Microsoft Outlook.

1. To open the AttachmentSecurity for Microsoft Outlook interface, click on the AttachmentSecurity icon in your Outlook toolbar.

2. The AttachmentSecurity for Outlook interface will be displayed.

Edit Email Attachment Security				
Options About				
Below is a list of all attachments that are blocked by default in Outlook. To unblock a file type, place a checkmark next to the listing. <b>NOTE:</b> Not all file types listed are blocked by all versions of Outlook.				
.ade Access Project Extension (Microsoft)     .adp Access Project (Microsoft)     .app Executable Application     .asp Active Server Page     .asx Windows Media Audio or Video Shortcut     .bas BASIC Source Code     .bat Batch Processing     .cer Internet Security Certificate File     .chm Compiled HTML Help     .cmd DOS CP/M Command File, Command File for Windows NT     .com Command     .cpl Windows Control Panel Extension (Microsoft)     .exe Executable File     .chs csh Script     .exe Executable File     .fxp FoxPro Compiled Source (Microsoft)     .hlp Windows Help File				
.hta Hypertext Application     .inf Information or Setup File     .ins IIS Internet Communications Settings (Microsoft)

Restart Outlook automatically     Cancel <u>OK</u>				

"Take control of your Microsoft® Outlook™ email attachments"

Copyright Lookout Software, LLC. 2003 – 2008. All rights reserved. Microsoft and Outlook are trademarks or registered trademarks of Microsoft Corporation. 15 Last update July 23, 2008.

### The Options Tab

The **Options** tab, which is the default tab displayed when AttachmentSecurity is opened, lists common file attachment types that Microsoft Outlook classifies as "Level 1" file types.

An unmarked checkbox next to a file type indicates that the file type is currently blocked in your Outlook, and you will not receive the file attachment type in emails.

To unblock a particular file type so you can receive it through Outlook email, simply check the checkbox next to the file type. When changes are made to any file type listing, the **Restart Outlook automatically** checkbox is automatically checked. This is because you must restart Microsoft Outlook after making changes in order to implement the new changes. Once you have selected which file types to block and unblock, click **OK**. Microsoft Outlook will restart automatically, and you will now be able to receive any file attachment types you chose. Changes to which file types you block and unblock can be made at any time by opening the AttachmentSecurity interface again.

# Getting Help with AttachmentSecurity for Microsoft Outlook

AttachmentSecurity for Microsoft Outlook is provided to the public free of charge, as is. Furthermore, Lookout Software, LLC. does not provide technical support for the AttachmentSecurity software application as it is cost prohibitive. While we have tested the software thoroughly in our lab and have found the software, in general, to be reliable, it simply may not work for every installation of Microsoft Outlook.

If you do find an issue with the software, and reasonably believe that it is a bug, we ask that you report the issue to our QA staff by filling out the Report Issue form at http://www.attachmentsecurity.com/reportissue.htm. A response to your issue submission by a Lookout Software representative is not guaranteed, and is highly unlikely.

You may also visit our Frequently Asked Questions section on the AttachmentSecurity for Microsoft Outlook website at http://www.attachmentsecurity.com/fag.htm.

## **Removing AttachmentSecurity for Microsoft Outlook**

- 1. Click Start; Control Panel.
- 2. From the Control Panel dialog click Add or Remove Programs.
- 3. Select AttachmentSecurity from the list of Currently Installed Programs; and click **Remove**.
- 4. Follow the on-screen instructions.
