What is OfficeCalendar? Sharing Microsoft Outlook Calendars and More...

OfficeCalendar is a simple software program that allows you to share Microsoft Outlook calendars without Microsoft Exchange Server. You can also share Outlook email, contacts, distribution lists and tasks with OfficeCalendar, and create editable group calendars where multiple users' Outlook calendar data is combined into a single calendar folder for easy group scheduling.

Whether you have a dedicated server computer or a basic peer-to-peer network, OfficeCalendar can be installed on practically any Microsoft Windows® based network. Each person wishing to share Outlook calendars, email, contacts, tasks, and/or distribution lists with OfficeCalendar must have a copy of Microsoft Outlook 2000, XP, 2003 or 2007. However, OfficeCalendar can work with a combination of these Outlook versions. OfficeCalendar does not work with Microsoft Outlook Express, which is a different product from Microsoft Corporation.

Once OfficeCalendar is installed and configured on your network it will create subfolders under each of your Outlook objects (calendar, contacts and tasks) for each other person that is sharing their Outlook information with you. For example, if you have a total of four users sharing Outlook with each other, OfficeCalendar will configure your Calendar folder structure similar to the illustration below.

Your personal Outlook calendar is always at the top of the calendar structure (this is the same for your Outlook contacts and tasks as well). Each other person you are sharing Outlook calendars with is listed by name directly under your calendar along with customized group calendars that show multiple users' appointments rolled into a single calendar view (see "Customized editable group calendars" caption above).

Shared Outlook email folders also appear as sub-folders, but you can change the name of the shared folder that will display under your Inbox once you've accepted the invitation from another user to share their email folder.

Nothing changes in the way you use Outlook after OfficeCalendar is installed. Entering appointments, contacts, etc. in Outlook with OfficeCalendar installed is accomplished in exactly the same way it was before OfficeCalendar was installed. For example, if you want to add an appointment to a colleague's calendar, just navigate to their Calendar folder from within your own Outlook, and enter the appointment item just as you would in your own calendar. Once your automatic synchronization has run, or you've clicked on the synchronization button, the appointment you added from within your copy of Outlook will then be added to the OfficeCalendar database. The appointment will then be added to your colleague's Microsoft Outlook calendar upon their next synchronization of OfficeCalendar. Each change made to your Outlook calendar, contacts and tasks by other users will prompt a notification of their change during your next sync. All changes made to an Outlook appointment, contact, distribution list and task are also documented in a history report for easy reference.

OfficeCalendar Installation Overview

There are two components to the OfficeCalendar software program: the **OfficeCalendar Server** and the **OfficeCalendar Client**. The OfficeCalendar Server is the central bridge for which all Microsoft Outlook users communicate and exchange data between each other. The OfficeCalendar Client is a Microsoft Outlook add-in that becomes part of your Microsoft Outlook program. The OfficeCalendar Client allows you to view and modify other people's Outlook calendar as well as communicate with the OfficeCalendar Server, which in turn passes your calendar updates to other users' Outlook calendars, and vice versa.

The five basic steps to setting up OfficeCalendar are:

1. Download the trial version of OfficeCalendar

Download the trial version of OfficeCalendar from our website at http://www.officecalendar.com/downloads/download.aspx. You only need to download the trial version of OfficeCalendar **once** – the software you'll need for all of your office's workstations are included within this download.

2. Install the OfficeCalendar Server Software

The second thing you'll need to do is install the OfficeCalendar Server software. The OfficeCalendar Server software **is only installed on one computer**. The OfficeCalendar Server software can be installed on any computer connected to your office's network. If you have a dedicated computer in your office that acts as a network file and/or application server then you could install the OfficeCalendar Server software on that computer. If you are installing OfficeCalendar on a peerto-peer network where there isn't a network server per-se, you will need to select one of the workstations on your network to install the OfficeCalendar Server. The OfficeCalendar Server and the OfficeCalendar Client can be installed and utilized on the same computer without problems.

Microsoft Outlook does not need to be installed on the computer that is running the OfficeCalendar Server unless you will be using the OfficeCalendar Client software on the same computer as well.

3. Add user accounts to the OfficeCalendar Server

Once you've installed the OfficeCalendar Server, you will need to open the OfficeCalendar Administration Console and add user accounts for all of the users in your office that will share Outlook calendars, contacts and tasks. Email sharing is set up using a different method, which is explained in the section **"Configuring Outlook email folder sharing"** on page 70.

4. Ensure that the OfficeCalendar Client installation folder is shared on your network

The initial OfficeCalendar Server installation also copies the OfficeCalendar Outlook add-in software required for each Outlook user to a folder called **c:\ocalclient**. This is done for your convenience so that each user on your network doesn't have to download the OfficeCalendar software separately.

During the initial installation of the OfficeCalendar Server, the OfficeCalendar installer copies the OfficeCalendar Client installation files to a specified folder and attempts to create a network share on this specified folder for you. However, this may not work on some computers.

5. Install the OfficeCalendar Client add-in on each Microsoft Outlook workstation

Finally, after you have created user accounts for all of your users, the OfficeCalendar Client is installed on each person's computer that will share Microsoft Outlook calendar, email, contacts and tasks in your office.

Installing the OfficeCalendar Server

- 1. If you have not done so already, download the OfficeCalendar trial version from our website at http://www.officecalendar.com/downloads/download.aspx.
- 2. Double-click on the **ocinstall.exe** file that you downloaded from <u>www.officecalendar.com</u>.

ocinstall.exe

3. From the **Welcome to the OfficeCalendar setup** screen, please note that you will only need to install the "**ocinstall.exe**" file you downloaded once. During the

initial setup, the OfficeCalendar Server installer will create a shared network folder which will be used to install the OfficeCalendar Client software for Microsoft Outlook. Click **Next** to proceed with your OfficeCalendar installation.

🐱 OfficeCalendar Server Setup	
Welcome to the OfficeCalendar setup. Please read the following important information before continuing.	
WELCOME!	^
Welcome to the installer for OfficeCalendar. DO NOT reinstall this file to any other computer. The server, which you are installing now, should only be installed once on your network. Once the server software is installed, each computer in your office with Microsoft Outlook will run the OfficeCalendar Client setup that is created on this computer by this installer. <u>Click here</u> for step-by-step instructions to guide you through the complete installation process.	
It is strongly recommended that you exit all Windows programs before continuing with this installation.	×

Starting and Stopping the OfficeCalendar Windows Service

The OfficeCalendar Server includes two components: the OfficeCalendar Administration Console and the Windows Service (OcalService). With the OfficeCalendar Windows Service running, users will be able to update their shared calendar, contact and task information through synchronizations even if no one is logged into the computer running the OfficeCalendar Server. However, the computer running the OfficeCalendar Server must be turned on for Windows Service to be active.

If, for any reason, you wish to stop the OfficeCalendar Windows Service, you can do so by following these simple steps:

- 1. On the OfficeCalendar Server PC, click Start and go to Control Panel.
- 2. From the menu list, choose **Administrative Tools**, then **Services**.
- Services File Action View Help ← → 🔟 🗳 🕼 🕼 😫 → ■ 🗉 ➡ Services (Local) Services (Local) Name A Description Status ^ **OcalService** Microsoft Office Dia... Run portio... Stop the service Software Shado... Manages s... Restart the service Net Logon Supports p... Remote... Enables an... Description: Network Connections Manages o... Started OfficeCalendar Service Network DDE Provides n... Network DDE DSDM Manages D... Network Location A... Collects an... Started Network Provisionin... Manages X... NT LM Security Sup... Provides s... CoalService OfficeCale... Started Office Source Engine Saves inst... Performance Logs a... Collects pe... Plug and Play Enables a c... Started Portable Media Seri... Retrieves t... Print Spooler Loads files ... Started Protected Storage Provides pr... Started
- 3. Scroll down and highlight **OcalService**.

4. On the left hand column, click **<u>Stop</u> the service**.

If the OfficeCalendar Windows Service is stopped, Outlook users will <u>not</u> be able to send and receive shared calendar, contact and task updates. However, having the OfficeCalendar Windows Service stopped will not impede your users' ability to continue using Outlook...they simply won't be able to send and receive (synchronize) with the OfficeCalendar Server until the OfficeCalendar Windows Service is restarted. To restart the OfficeCalendar Windows Service, simply follow the same steps above for stopping the OfficeCalendar Windows Service. However, instead of choosing the option to **Stop** the service, you'll choose the option **Restart**.

Ensure that the OfficeCalendar Client Installation Folder is shared on your network

Ensure that the **c:\ocalclient** folder on the computer where you installed the OfficeCalendar Server is shared on your network so that all workstations wishing to use OfficeCalendar can browse to it in order to install the OfficeCalendar Client for Microsoft Outlook. All workstations needing to install the OfficeCalendar Client will need access to this shared folder.

During the initial installation of the OfficeCalendar Server, the OfficeCalendar installer copies the OfficeCalendar Client installation files to a specified folder and attempts to create a network share on this specified folder. However, this may not work on some computers. The default location for the OfficeCalendar installation files is **c:\ocalclient**. You can quickly determine if this folder is shared to other network users by browsing to the **c:** folder (on the computer where you installed the OfficeCalendar Server) with Windows Explorer or My Computer. Locate the **ocalclient** folder – if it is shared to other network users, the folder will have a hand just under the folder as shown in the illustration below.

If the OfficeCalendar installer was unable to create a share on your designated OfficeCalendar Server computer, you can easily create a share manually by following the instructions below.

To share the c:\ocalclient folder on your network:

- 1. Open Windows Explorer, and then locate the folder **c:\ocalclient**.
- 2. Right-click on the c:\ocalclient folder, and then click Sharing and Security.
- 3. Select the check box Share this folder on the network; and click OK.

You will now notice that **c:\ocalclient** folder now has a hand beneath it to indicate that it is shared on your network.

Quick Tip Mhat if you can't share the ocalclient folder? If, for some reason, a workstation cannot open the shared ocalclient folder there is a simple alternative to installing the OfficeCalendar client: simply copy the entire ocalclient folder to another drive on your network that is accessible to the workstation, and have the workstation install from this new accessible share.

Configuring your organization's OfficeCalendar Online account

If you've created an OfficeCalendar Online account for your organization, you'll need to activate the OfficeCalendar Online sync process and configure the OfficeCalendar Online sync settings in the OfficeCalendar Administration Console.

If you chose not to create an OfficeCalendar Online account immediately following installation but wish to do so now please refer to *step 18c* on *page 19*. Then follow the steps on *pages 17-20* for instructions on how to create your OfficeCalendar Online account.

- 1. Open the OfficeCalendar Administration Console and click on the **OfficeCalendar Online** tab at the top.
- 2. Click the **Sync Now** button to synchronize all users' information to your organization's OfficeCalendar Online account.

a OfficeCalendar on

4. You and all other users that have been created in the OfficeCalendar Administration Console can now begin logging into their OfficeCalendar Online account to access their individual and shared Outlook calendar, contact and task folders. You can find your unique login URL to your organization's OfficeCalendar Online account in the OfficeCalendar Online tab in the OfficeCalendar Administration Console.

5. To log into your OfficeCalendar Online account, simply browse to your organization's OfficeCalendar Online login URL. Users can log in using the User Name and Password assigned to them in the OfficeCalendar Administration Console. For more information about setting up your OfficeCalendar Online, refer to section "Instantly Updating your Outlook Calendar, Contacts and Tasks with your OfficeCalendar Online Account" on page 36.

NOTE: If a user logs into their OfficeCalendar Online account before syncing their Outlook client information with the OfficeCalendar Server, their online calendar, contact and task folders will at first appear blank. Once the user syncs their Outlook client with the OfficeCalendar Server, their Outlook folder information will appear in OfficeCalendar Online. Calendar information will be available for all future and recurring appointments, and for past appointments up to 30 days prior to the current date.

Installing the OfficeCalendar Add-on Client on Microsoft® Outlook Workstations

 From each workstation where you are installing the OfficeCalendar Outlook add-in Client, browse to the c:\ocalclient folder on the computer where the OfficeCalendar Server is installed. The easiest way to do this is to click Start | Run; and type in \\YourOfficeCalendarServer'sComputerName\ocalclient; and click OK. (In the example below, "ocserver" is the OfficeCalendar Server's computer name.)

Run ? X Image: Type the name of a program, folder, document, or Internet resource, and Windows will open it for you. Open: Wocserver/vocalclient OK Cancel Browse
Quick Tip
Don't know your OfficeCalendar Server's computer name?
If you do not know the name of the computer where your OfficeCalendar Server is running simply open the OfficeCalendar Server program on that computer. Open the OfficeCalendar Server program by right-clicking on the OfficeCalendar Server icon (shown below) in the task tray and selecting Show Admin Console . If the icon is not in the task tray, then the OfficeCalendar Server will need to be started.
The OfficeCalendar Server's computer name is displayed at the top of the OfficeCalendar Administration Console screen (highlighted below).

You'll notice that the synchronization icon will change states to while your Outlook is synchronizing with the OfficeCalendar Server. Once the synchronization is complete it will change back to its original state.

Once your first synchronization is complete you'll notice that new folders have been created under your root (main) Calendar, Contacts, and/or Tasks folders. A new folder will be created for everyone that has previously performed his or her first synchronization of OfficeCalendar. Also, OfficeCalendar creates a default Group Calendar folder, which will appear under your Calendar folder (shown below).

If you are the first person to synchronize with the OfficeCalendar Server you will only see the group calendars and Resource user folder(s) that you have rights to view under your root **Calendar** folder. No other items will be created for any of the other users you are sharing Outlook information with until they have performed their first OfficeCalendar synchronization.

Once other users have synchronized their Outlook data with the OfficeCalendar Server, their folders will appear in your Outlook folder list during your subsequent synchronizations.

Setting up and sharing your Outlook email folders with OfficeCalendar is different than setting up and sharing your Outlook calendar, contact and task folders. OfficeCalendar email sharing uses your Outlook email send/receive synchronization to share your email folders with other users. Please refer to the section "**Configuring Outlook email folder sharing**" on page 70 for instructions on setting up, configuring, and using OfficeCalendar email sharing.

Instantly Updating your Outlook Calendars, Contacts and Tasks with your OfficeCalendar Online Account

Once all users' profiles have been synchronized to your organization's OfficeCalendar Online account through the OfficeCalendar Administration Console (for steps on how to do this, see **"Configuring your organization's OfficeCalendar Online account"** on page 25), you can begin synching each client's Outlook information to

their OfficeCalendar Online account so they can access their Outlook calendars, contacts and tasks online.

- 1. Open Microsoft Outlook
- 2. Click the Synchronize OfficeCalendar Online icon.

You'll notice that the synchronization icon will change states to while your Outlook is synchronizing with the OfficeCalendar Online Server. Once the synchronization is complete it will change back to its original state.

You will not notice any changes in Microsoft Outlook. By synchronizing your Outlook with your organization's OfficeCalendar Online account, all of your Outlook calendar, contact and task folders are now available online for access through your individual OfficeCalendar Online login, set up through the OfficeCalendar Administration Console. For instructions on how to access OfficeCalendar Online, see section "*Accessing your Outlook Calendars, Contacts and Tasks with OfficeCalendar Online"* on page 96.

Administering OfficeCalendar

OfficeCalendar provides several options for administering user accounts and security as well as advanced settings for network administrators. All of the administration for OfficeCalendar is done from one simplified screen: the **OfficeCalendar Administration Console**.

From the OfficeCalendar Administration Console you can:

- Add, edit, and delete user accounts and shared resource folders.
- Create and add users to customized user groups.
- Create and add users to one or more group calendars with In Group/View Group access.
- Set a user's security access to other Outlook user and resource calendars, contacts and tasks information.
- Configure advanced network settings and other advanced options for larger groups.
- Manage your settings for your organization's OfficeCalendar Online account.

To access the OfficeCalendar Administration Console double-click on the **OfficeCalendar Admin** icon if the OfficeCalendar Server is not already running.

If the OfficeCalendar Server is running right-click on the OfficeCalendar Admin icon in the Windows task tray, and select **Show Admin Console**.

Showing or Hiding Advanced Features within the Admin Console

OfficeCalendar offers several advanced features that most customers do not require. By default, these features do not show within the OfficeCalendar Administration Console. This keeps the OfficeCalendar Administration Console streamlined for faster and easier administration. OfficeCalendar's "Advanced" features include:

- User Group creation and administration
- Customer Group Calendar creation and administration
- Configuration settings for OfficeCalendar's Outlook Free/Busy Server
- User Group Filters

These features can easily be shown by right-clicking on the OfficeCalendar Server icon in the Windows task tray, and selecting **Show Advanced Features**.

With the Advanced features shown, you'll notice three (3) additional tabs within the OfficeCalendar Admin Console's main dialog box: **User Groups**, **Group Calendars** and **Free/Busy**.

This user car	n C none C read I write C delete existing user's records.
	Cancel Save and New Save and Close

These "Advanced" features are explained and demonstrated in more depth throughout the OfficeCalendar User's Guide. However, if you are like most OfficeCalendar customers and don't require these advanced features, we highly recommend that you simply leaved them turned off. This will keep your OfficeCalendar installation streamlined for faster setup and data entry.

Adding New OfficeCalendar User Accounts

- 1. Open the OfficeCalendar Administration Console.
- 2. Click the **Add New** button.

Add New

3. Enter the Username, First name, Last name, and Password for the user you wish to add to OfficeCalendar; type in a unique name to display the folder within other user's Outlook folder list in the Folder Name field (optional). You can also create and add users to user groups (reference the topic "Managing OfficeCalendar User Groups" on page 42 for more details), as well as group calendars with In Group and/or View Group access (reference the topic "Managing Group Calendars for Group Scheduling" on page 51 for more details). Then assign the basic security rights for the user you are adding by clicking on the appropriate radio buttons (you may assign more detailed security rights once you've added each user).

User Detai	ls 🛛
Username	Robert Password xxxxxxx
First name	Robert Last name Thompson
Folder Name	Thompson, Robert
User Group	Service Technicians New User Group
Group Calendar Folders	Group Calendar In Group View Group Group Calendar Image: Calendar Calendar Engineers Image: Calendar Calendar Service Technicians Image: Calendar Image: Calendar
🔲 Create u	ser as a resource. This user is an administrator.
Existing user	rs can ⊙ none ⊙ read ເ€ write ⊙ delete this user's records.
This user ca	n ⊂ none ⊂ read ● write ⊂ delete existing user's records.
	Cancel Save and New Save and Close

If the user you are adding will administer the OfficeCalendar Server, be sure to check the **This user is an administrator** check box. At least one OfficeCalendar user must be assigned as an administrator, and thus the first user you add to OfficeCalendar will be automatically assigned as an OfficeCalendar Server Administrator. More than one user can be can be assigned as an OfficeCalendar Administrator.

4. Save the user account information you've added:

A). Click **Save and New** to finish adding the user to the OfficeCalendar Server, and immediately add a new user.

Save and $\underline{\mathsf{N}}\mathsf{ew}$

-Or-

B.) Click **Save and Close** if you do not wish to add any other users.

Save and Close

Editing OfficeCalendar User Accounts

1. Open the OfficeCalendar Administration Console.

- 2. Highlight the user account you want to edit in the **User/Resource List**, and click the **Edit** button.
- 3. Edit the user's details.
- 4. Click Save and Close.

Deleting OfficeCalendar User Accounts

- 1. Open the OfficeCalendar Administration Console.
- 2. Highlight the user account you want to delete in the **User/Resource List**.
- 3. Click the **Delete** button; a message will appear asking to confirm the action to delete the user; select **Yes** if you are sure you want to delete the user.

Deleting a user from OfficeCalendar will free up an additional user license. However, when an OfficeCalendar user account is deleted, the deleted user account information will remain in the OfficeCalendar database. This is done to notify the OfficeCalendar Client software for others users that User "X" no longer exists, and thus User "X's" subfolders are removed from their Microsoft Outlook folder list. Once a user is deleted, you can NOT add it back to the OfficeCalendar database. You will need to create a new user account with a unique **First Name + Last Name** combination.

Managing OfficeCalendar User Groups

Overview

OfficeCalendar administrators have the option in the OfficeCalendar Administration Console to create and add users to **user groups**. User groups are usually created to classify users with something in common (such as co-workers in a certain department, or a special committee), and are very useful if you have a larger number of users. Administrators can create as many user groups as necessary, but a user may only belong to <u>one</u> user group within OfficeCalendar (not to be confused with group calendars where a person or resource can be in more than one group calendar).

By default, OfficeCalendar creates the User Group, "General", which can be deleted.

Adding OfficeCalendar User Groups

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **User Groups** tab, and click the **Add** button.

<u>A</u>dd

3. Enter the **Name** for the new user group, and then click **OK**.

User Group - Ne	w		
Name	Installe	ers	
<u> </u>		<u>C</u> ancel	

-Or-

You can also add a new user group when you are adding or editing an OfficeCalendar user account. Simply click on **New User Group** in the **User Details** dialog box. Enter the **Name** for the new user group, and click **OK**.

New <u>U</u>ser Group

Editing OfficeCalendar User Groups

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **User Groups** tab. Under **Groups**, highlight the user group you want to edit and click the **Edit** button.

3. Enter the new Name for the user group, and then click OK

Deleting OfficeCalendar User Groups

- 3. Open the **OfficeCalendar Administration Console** and click on the **User Groups** tab.
- In order to delete a user group, all users that are in the user group you want to delete must be moved to another user group. You can do this using the Move to Group function (refer to the next topic, "Using the Move to Group Function").
- 5. After the user group is empty and no users are listed under the group, make sure the user group you want to delete is highlighted.
- Click on the **Delete** button. A message will appear asking to confirm the action to delete the user group; select **Yes** if you are sure you want to delete the user group.

Delete
OfficeCalendar 🛛 🛛
You are about to delete "Engineers" group. Continue?
<u>Y</u> es <u>N</u> o

OfficeCalendar will not delete a user group if active users are still listed under the user group in question. Therefore, it is impossible to delete user accounts by deleting user groups.

Using the Move to Group Function

To move one or more users from one user group to another:

- 1. Open the **OfficeCalendar Administration Console** and click on the **User Groups** tab.
- 2. Highlight the user group with the user accounts you want to move. Then highlight the user account you want to move to another user group.
- 3. Click on the **Move to Group** button.

Move To Group...

4. Select the new user group you want to add the user to, and then click **OK**.

Setting a User's Security Rights in OfficeCalendar

OfficeCalendar provides a full complement of security settings that can be applied to each user. This allows the OfficeCalendar administrator to easily determine for each user whose calendars they can see; whose calendar information they can add/edit; and which calendars from which they can delete information.

There are four types of security settings that can be applied to an OfficeCalendar user:

- None check the None access checkbox if you do not want a user to have any rights at the time of creation. Larger organizations will find this useful to avoid changing the default security settings for long user lists.
- Read check the Read access checkbox to allow a user to view another user's specified Outlook object (calendar, contacts, and/or tasks). By default, every new

user you add to OfficeCalendar has Read access to all other user's Outlook objects.

- Write check the Write access checkbox to allow a user to add new items to, and modify existing items of, other specified user's Outlook object (calendar, contacts, and/or tasks). By default, every new user you add to OfficeCalendar has Write access to all other user's Outlook objects.
- Delete check the Delete access checkbox to allow a user to delete items from other specified user's Outlook objects. NOTE: Use caution when granting another user Delete access. A user with delete access can delete items from a shared folder at any time, and once an Outlook item is deleted it may not be recoverable.
- Administrator check this box for each user you want to give access to the OfficeCalendar Server Administration Console. It is a good practice to have at least two individuals marked as "administrator" in OfficeCalendar. Once marked as administrator, a user can log into the OfficeCalendar Administration Console with their user account's user name and password.

User Detai	ls	
Username	Ben	Password ***
First name	Ben	Last name Robinson
Folder Name	Robinson, Ben	
🔲 Create u	ser as a resource.	This user is an administrator.
Existing user	scan C none C read (🖲 write 🔿 delete this user's records.
This user ca	n C none C read (• write C delete existing user's records.
	<u>C</u> ancel	Save and <u>N</u> ew <u>S</u> ave and Close

The same security rights that apply to the Outlook Contacts folder apply to Outlook Distribution Lists because they are objects within the Contacts folder. For example, if User A has read, write and/or delete security rights to User B's Contacts folder, then User A will be able to read, write and/or delete distribution lists within User B's Contacts folder.

To set a user's access to other user's Outlook objects (calendar, contacts, and/or tasks):

- 1. Open and log into the OfficeCalendar Administration Console.
- 2. From the **User/Resource List**, highlight the user account you want to edit.

3. Choose the security setting you want the user to have with respect to each other OfficeCalendar user's Outlook objects (calendar, contacts, and/or tasks) by checking and/or un-checking the corresponding access.

When changing security settings for a OfficeCalendar user, each time you change a setting by checking or un-checking a box, the security setting is automatically saved without the need to perform any further action.

a user without the proper security rights to another user attempts to odify an Outlook element in a shared folder, a message will prompt ext synchronization notifying the user that he/she does not have the odo so and the element will return to its original state.	on the
or example, if User A does not have the rights to delete appointment ser B's calendar, but does so regardless; a security rights notification lessage similar to the one below will appear on User A's next sync ar oppointment will reappear in User B's calendar.	1
1 OfficeCalendar Alert	
You do not have proper security settings in the OfficeCalendar Admin Console to delete calendar item 'Meeting'. Your changes were discarded. Please contact your administrator if you feel this is in error.	*

Sample Security Settings

In the following example we will set Nicole Kennedy's security access to the following criteria:

- Nicole can read, write/edit, and delete appointments on Justin Jackson's, Catherin Jones' and Ben Robinson's calendars; but has no access their contacts and tasks.
- Nicole has no access Jenna Black's Outlook items.

User/Res List of existi specific item change the	ource List ing users and re n. Once highlight item's rights.	sources. Click t ed, you can ec	o highligt	ta	User/Resourcest	in the User List a Id have for other tely.	nd then users be	select th	e rights anges are

					Jenna	Contacts			
					Jenna	Tasks			
A	dd New E	dit Deļe	te		User Syncs	🗹 Galendar 🖪	Z Conta	icts	🔽 Tasks

Note about "Read" Security Access:

In the example above, Nicole does not have **Read** access to Justin's, Catherine's, Ben's or Jenna's contact or task items. Therefore, OfficeCalendar will not create **Contacts** or **Tasks** sub-folders for Justin, Catherine, Ben or Jenna in Nicole's copy of Microsoft Outlook.

Quick Tip

Use the **Filter by User Group** and **Check All/Uncheck All** features for faster administration with larger groups. These features can be found in the OfficeCalendar Server and Administration Console under the *Accounts/Security* and *Group Calendars* tabs.

For example, if users are categorized into several user groups, you can **Filter by User Group** to pull up a particular user group and assign security rights that may be specific to users in that user group.

The **Check All/Uncheck All** feature allows administrators to assign the same security rights to multiple users with one click. If the box below **Check All/Uncheck All** is selected corresponding to either *Read, Write* or *Delete,* the entire list of users in a user group will be given that specific security right. If the box is unchecked, that means that the security right(s) will not apply to the list of users. This feature also applies to the *In Group* and *View Group* security rights.

*Note: Security rights can still be applied to users individually, as shown in the screens below.

Managing OfficeCalendar shared resource folder accounts

With OfficeCalendar you can create and share unlimited Outlook Calendar and Contacts resource folders. Resource folders are Calendar and Contacts folders that are not necessarily associated with a user, although they could be if you wish to use them for that specific purpose. Resource folders are defined Calendar and Contacts

folders in Outlook which are typically used for things like a company contacts folder, firm-wide trial calendar (for attorneys), conference room scheduler, etc.

You can <u>NOT</u> create shared Tasks resource folders with OfficeCalendar.

Adding shared resource folder accounts

Adding a shared resource folder account is almost identical to creating an OfficeCalendar user account. To add a shared resource folder account to OfficeCalendar:

- 1. Open the OfficeCalendar Administration Console.
- 2. Click the **Add New** button.

Add New

3. Enter a Username, First name, Last name, and Password for the resource account you wish to add to OfficeCalendar; type in a unique name to display the folder on user's Outlook folder list in the Folder Name field (optional); check the box Create user as a resource. You can also create and add resource folder accounts to user groups (reference the topic "Managing OfficeCalendar User Groups" on page 42 for more details), as well as group calendars with In Group and/or View Group access (reference the topic "Managing Group Calendars for Group Scheduling" on page 51 for more details). Next, assign the basic security rights for the resource account you are adding by clicking on the appropriate radio buttons. However, because a resource folder account is not physical user, it will not have security rights to other users; physical users will only have security rights to the resource folder account.

User Detai	ls	
Username	LargeCon	Password
First name	Large	Last name Conference
Folder Name	Large Conference Room	
User Group	General	▼ New User Group
Group Calendar Folders	Group Calendar In Group Calendar	I Group View Group New Group Calendar
	scan C none C read 🤍	This user is an administrator. write C delete this user's records. write C delete existing user's records.
	Cancel	Save and New Save and Close

4. Save the resource folder account information you've added:

A). Click **Save and New** to finish adding the user to the OfficeCalendar Server, and immediately add a new user.

Save and <u>N</u>ew

-Or-

B.) Click **Save and Close** if you do not wish to add any other users.

Save and Close

Editing and deleting shared resource folder accounts

The same procedures used to edit and delete OfficeCalendar user accounts are used for editing and deleting OfficeCalendar shared resource folder accounts. Also, the same procedure used to set OfficeCalendar user account security is used to set security for OfficeCalendar shared resource folders.

Managing Group Calendars for Group Scheduling

Overview

OfficeCalendar administrators can create and name multiple group calendar folders, select the users/resources that are included in these group calendars, and assign who the group calendars will be visible to. Users with the appropriate security rights can add, edit and delete appointment items directly from group calendar folders. Refer to the topic "*Group Scheduling with OfficeCalendar's Outlook Group Calendars"* (page 89) for more information about OfficeCalendar's Outlook group calendars.

Adding Group Calendars

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **Group Calendars** tab, and click the **Add New** button.

Add New

3. Enter the Name for the new group calendar, and then click OK.

Group Calendar - New			×
Name	Service	Technicians	
<u> </u>		<u>C</u> ancel	

-Or-

You can also add a new group calendar folder when you are adding or editing an OfficeCalendar user account. Simply click on **New Group Calendar** in the **User Details** dialog box. Enter the **Name** for the new group calendar folder, and click **OK**.

New <u>G</u> roup Calendar

**NOTE: For technical reasons, you can not create a group calendar with the same name as an existing User or Resource defined within the OfficeCalendar User/Resource List.

Editing Group Calendars

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **Group Calendars** tab. Under **Group Calendars**, highlight the group calendar you want to edit and click the **Edit** button.

3. Enter the new **Name** for the group calendar folder, and click **OK**.

When users that can see the selected group calendar synchronize again after the group calendar is edited, the new group calendar name will replace the previous name.

Deleting Group Calendars

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **Group Calendars** tab. Under **Group Calendars**, highlight the group calendar you want to delete and click the **Delete** button.

Delete

3. A message will appear asking to confirm the action to delete the selected group calendar folder; select **Yes** if you are sure you want to delete the group calendar.

OfficeCalendar				
You are about to delete selected group calendar. Continue?				
Yes	No			

Use extreme caution when deleting a group calendar folder, as this action affects all users associated with the group calendar. However, if a group calendar folder is inadvertently deleted, it may be recreated by adding it again.

Using In Group/View Group Calendar Functions

After a group calendar folder is created, OfficeCalendar administrators can add users to and/or give them rights to view multiple group calendars with the **In Group** and **View Group** functions.

- 1. Open the OfficeCalendar Administration Console.
- 2. Click on the **Group Calendars** tab. Under **Group Calendars**, highlight the group calendar you want to add users to or give viewing access to.
- 3. Under **Users**, click on the appropriate **In Group** and/or **View Group** checkboxes next to the user(s) listed.

😼 OfficeCalendar on							
OfficeCalendar							
Accounts/Security User Groups Group Cal Group Calendars Arson Hearings Custody Hearings Divorce Hearings	Users	nfiguration Fi		pport OfficeCalendar (er by er Group All Users

			Cat	Catherine Jones	U		
		M	Ben Jenna	Ben Robinson Jenna Black	UU		
Add New Edit Delete							
Configure Licensing Demo Expires: 5/28/2008		Enter Coj	de	Close Console	Help		

In the above example, both Nicole's and Catherine's appointments will appear in the Group Calendar "Arson Hearings" as both have the **In Group** option selected. Also, both Nicole and Catherine will see the Group Calendar "Arson Hearings" from within the Outlook folder list as both the have the **View Group** option selected.

Ben's appointments will not appear in the Group Calendar "Arson Hearings" as the In **Group** option is not selected for him; but he will be able to see the Group Calendar "Arson Hearings" as the **View Group** option <u>is</u> selected for him. Thus, unlike Nicole and Catherine, Ben's appointments will not appear in the Group Calendar "Arson Hearings". However, he will be able to see the Group Calendar. Ben's ability to interact with the Group Calendar is determined by the rights for which he has to Nicole's and Catherine's appointments in the **Accounts/Security** tab.

Justin's and Jenna's appointments will not appear in the "Arson Hearings" Group Calendar, nor will they be able to see the "Arson Hearings" Group Calendar as they have no In Group or View Group options selected.

In Group/View Group Calendar Functions Scenarios

User is In Group Calendar and can View Group Calendar

This is the most frequently used setting. A good example is a law firm, in which case the attorneys not only need to be included in the group calendar, but they also need to view the group calendar to see who is available for court appearances and other scheduling matters.

"Sharing Microsoft Outlook Calendar and Contacts without Exchange Server"

54 Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

User is NOT In Group Calendar but can View Group Calendar

This calendar setting is useful, for example, if a secretary whose personal appointments do not need to be on a calendar for scheduling, but she needs to see everyone else's appointments in order to schedule appropriately.

User is In Group Calendar, but CANNOT View Group Calendar

This would be appropriate, for example, if an exterminator's office needs all field agents' appointments on a calendar so their secretary can schedule appropriately. However, the field agents do not necessarily need to see the group calendar for all other agents.

User is NOT In Group Calendar, and CANNOT View Group Calendar

This setting would apply to a user who might be included in other group calendars, but does not have any reason to be included or see a certain group calendar that is meant for other users.

Setting a User's Security Rights in Group Calendars

Security rights that OfficeCalendar administrators assign to users also apply to group calendar folders. For example, if User A and User B are both able to **View Group** Calendar X and are **In Group** Calendar X, User A will not be able to view User B's appointments if User A does not have the right to view User B's appointments from with the **Accounts/Settings** tab.

Configuring OfficeCalendar to Work Over a Specified Network Port

By default OfficeCalendar communicates across networks on port number 1802. Network administrators my either need to know this port number for a specific purpose, or change it if it conflicts with another application that communicates across the same port. Also, if you have users that synchronize their Outlook calendars across the Internet, your network administrator may need to open or create and exception port 1802 on the company's firewall for Microsoft Outlook and OfficeCalendar.

The port number setting for OfficeCalendar is configured on both the OfficeCalendar Server and the OfficeCalendar Client (Outlook add-in). Thus, if you change the port number at the OfficeCalendar Server, you will need to change the port number setting on <u>ALL</u> OfficeCalendar Clients from within Microsoft Outlook.

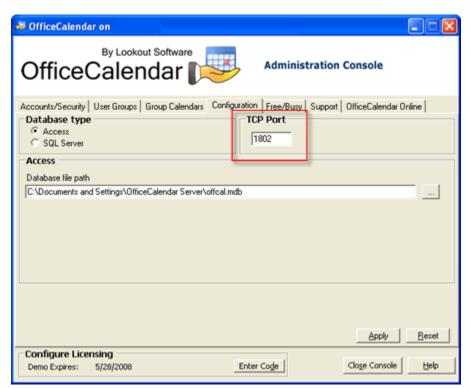

To change the port number settings on the OfficeCalendar Server

1. Open the OfficeCalendar Administration Console.

2. Click the **Configuration** tab.

3. Under **TCP Port** on the **Configuration** tab, change the **TCP Port Number**, and click **Apply**.

To change the port number setting on the OfficeCalendar Client to correspond with the OfficeCalendar Server

- 1. Open Microsoft Outlook.
- 2. Click on the Configure OfficeCalendar icon.

3. From the **Configure OfficeCalendar** dialog box click on the **Server Connections** tab, type in the **Port Number**, and click **Save**.

😼 Configure OfficeCalendar

	Primary Serve	OC-SERVE	R			
	Port Number		1802			
				-		

- 4. In order for the port a number change to take effect, you must close and re-open Microsoft Outlook.
- 5. Repeat *steps 1 through 4* until all other Outlook Clients that have the OfficeCalendar Outlook add-in Client installed.

Managing your organization's OfficeCalendar Online account

If you have set up your OfficeCalendar Online account and performed the initial synchronization to your organization's OfficeCalendar Online account through the OfficeCalendar Administration Console (see "**Configuring your organization's OfficeCalendar Online account**" on page 25), you can choose to automatically synchronize database information under the OfficeCalendar Online tab.

To activate automatic database synchronization to OfficeCalendar Online

You can set your OfficeCalendar Server to automatically sync all calendar, contact, and/or task updates to your OfficeCalendar Online account. This way, once a user syncs his/her client, the OfficeCalendar Online account will reflect any changes immediately.

- 1. Open the OfficeCalendar Administration Console.
- 2. Click OfficeCalendar Online tab.
- 3. Check the box next to Activate Online Sync.

Configuring the OfficeCalendar Client

Each OfficeCalendar user has configuration settings that allow them to connect to the OfficeCalendar Server; pre-set how often OfficeCalendar will automatically synchronize with the OfficeCalendar Server for the purpose of sending and receiving updates; switch between working online and offline with the OfficeCalendar Server while using Outlook; and more.

To open the OfficeCalendar Client configuration settings simply click on the **Configure OfficeCalendar** icon from any computer Outlook and the OfficeCalendar Outlook add-on are installed.

The OfficeCalendar Client Configuration screen has several tabs that enable users to easily navigate to the appropriate area of configuration. The first tab-screen that appears upon opening the OfficeCalendar Client Configuration screen is titled **Sync Settings**. You'll also see the tabs **Server Connections**, **User Details**, **Support** and **About** on the **Configure OfficeCalendar** screen as well.

🕫 Configure OfficeCalendar 🛛 🔀

	Synchronize my tasks: • Yes • No Automatically synchronize every : 15						
	Select Group folders and users Select Synchronize folders at startup Image: Yes						
Turn on Notification of Appointments Image: Cancel Apply							

The Sync Settings Tab

The **Sync Settings** tab includes the following configuration options:

Connection Setting – this allows the user to choose whether or not they want to work online or offline from the OfficeCalendar Server while working in Microsoft Outlook. This is a useful feature for users with notebook computers, particularly where work is often performed while away from the office, and the notebook computer is not connected to the office's LAN (local area network). Selecting the Offline radio button will turn off "Can't find OfficeCalendar Server" prompts, which occur each time OfficeCalendar tries to synchronize updates with the OfficeCalendar Server and is unable to make a connection. When users turn their connection setting to Offline, the Synchronize OfficeCalendar icon will turn to a red "X" icon to notify users that they are offline and not synchronizing their Outlook information to the OfficeCalendar Server.

Also, in-office desktop users may want to use this feature from time-to-time in instances where they need to work in Microsoft Outlook, while the computer that runs the OfficeCalendar Server is shut down for maintenance.

Reference the topic "*Working Offline"* (*page 95*) for more details about this topic.

Synchronize appointments – this allows the user to choose whether or not they want to synchronize their Microsoft Outlook calendar appointments with the OfficeCalendar Server. This option exists for several reasons. First, it provides an additional level of security for the end user, ensuring that their Outlook calendar appointments will never leave the confines of their computer. Second, it provides increased synchronization speed as it is one less option that OfficeCalendar has to update while synchronizing Microsoft Outlook with the OfficeCalendar Server.

Synchronize appointments:	Yes	C No		
---------------------------	-----	------	--	--

Synchronize contacts – this allows the user to choose whether or not they
want to synchronize their Microsoft Outlook contacts with the OfficeCalendar
Server. This option exists for several reasons. First, it provides an additional level
of security for the end user, ensuring that their Outlook contacts will never leave
the confines of their computer. Second, it provides increased synchronization
speed as it is one less option that OfficeCalendar has to update while
synchronizing Microsoft Outlook with the OfficeCalendar Server.

Synchronize contacts:	C Yes	No No			
	Quick Ti	in			
The Microsoft Outlook Contacts object represents the single largest data set that OfficeCalendar synchronizes. If you have a large number of Microsoft Outlook contacts, setting the Synchronize contacts option to No could potentially improve the speed in which OfficeCalendar synchronizes with the OfficeCalendar Server and possibly improves the performance of Microsoft Outlook during OfficeCalendar synchronizations.					
Sync Settings Server Connectio	ns 🗍 User Detail	s Support			
Connection setting:	C Online	Offline			
Synchronize appointments:	Yes	C No			
Synchronize contacts:	C Yes	No			

Synchronize tasks - this allows the user to choose whether or not they want to synchronize their Microsoft Outlook tasks with the OfficeCalendar Server. This option exists for several reasons. First, it provides an additional level of security for the end user, ensuring that their Outlook tasks will never leave the confines of their computer. Second, it provides increased synchronization speed as it is one less option that OfficeCalendar has to update while synchronizing Microsoft Outlook with the OfficeCalendar Server.

I	Automatically synchronize every - this allows the user to set how often they
	wish to synchronize their Outlook data with the OfficeCalendar Server. The
	default setting for this field is 15 minutes. While we do not recommend that you
	set this field for less than 15 minutes, it can be set as low as 10 minutes for
	those that need more frequent updates. A user can, however, click the
	Synchronize OfficeCalendar icon on the Outlook toolbar to manually invoke the
	synchronization between their Outlook and the OfficeCalendar Server any time
	wish to get an immediate update.

No

C Yes

	Automatically synchronize every :	15	minutes		
--	-----------------------------------	----	---------	--	--

Synchronize tasks:

Select Group folders and users – this allows users to choose which Outlook group calendars; and other user/resource calendar, contact and task folders in which they wish to synchronize.

This option to select which group calendar folders and which users to synchronize with exists for several reasons. First, a user may not have a need to view a certain group calendars, resource calendars and/or user calendars, even though they were given the ability to do so in the OfficeCalendar Administration Console. Choosing not to synchronize with other users and/or one or more group calendars keeps the Microsoft Outlook Calendar folder list cleaner and thus easier to navigate. Second, it provides increased synchronization speed if OfficeCalendar does not have to update all available group calendars, user calendars, and resource calendars while synchronizing with Microsoft Outlook. However, if a user is working offline this option will not be available.

Refer to the topic "*Managing Group Calendars for Group Scheduling"* (page 51) for more information about OfficeCalendar's Outlook group calendars. Refer to the topic "*Selecting Group Calendars and User Folders"* (page 83) for more information about selecting which group calendars and users to synchronize.

Synchronize folders at startup – this allows the user to choose whether or not they want to synchronize their Microsoft calendar, contacts and tasks immediately upon the startup of Microsoft Outlook. By default, this option is set at "No." This option exists for several reasons. First, it provides the user with an immediate synchronization at startup, and voiding the set time interval that must be passed for the first synchronization to occur. Second, this option will instantly notify the user if the OfficeCalendar Server cannot be reached after trying to synchronize with the OfficeCalendar Server at startup.

Reference the topic "*Working Offline"* (*page 95*) for more details about what to do if the OfficeCalendar Server cannot be reached.

Turn on Notification of Appointments – this allows the user to choose whether or not they are notified of appointment additions, modifications and/or deletions within their calendar made by other users. If notifications are turned on, a popup dialog will appear in the user's Outlook window after the synchronization if any appointment modifications were made to the user's calendar by another user since the last synchronization. If the notifications are turned off, the user will not see this popup dialog and will not be notified of any appointment modifications. By default, this option is checked. Reference the topic "Appointment Notifications and Tracking History" (page 86) for more details about appointment notifications.

Turn on Notification of Appointments 🛛 🔽

The Server Connections Tab

As previously described, OfficeCalendar is a client/server application, whereby the OfficeCalendar Client communicates with the OfficeCalendar Server. Before the OfficeCalendar Client can communicate with the OfficeCalendar Server, two primary configuration settings must be present: the **Server Name** and the **Port Number**. The **Server Name** represents the full computer name of the computer that is running the OfficeCalendar Server, and the **Port Number** represents the TCP port for which the OfficeCalendar Server and Client communicate over.

The **Server Connections** tab, found in the **Configure OfficeCalendar** dialog box, contains both **Primary Server Name** and **IP Address of Primary Server** connection settings. Most OfficeCalendar Client users will only need the Primary Server Name info configured and, if the OfficeCalendar Client is installed from the shared **c:\ocalclient** folder, this info will be automatically configured. Thus, it is likely that a user will never need to do anything with these settings.

🕫 Configure OfficeCalendar 🛛 🛛								
	OfficeCalendar Client Configuration Configure connection details and client configuration settings.							
	Sync Settings Server Connections User Details Support About							
	Primary Server Name SERVER1							
	Port Number 1802							
	IP Address of Primary Server							
	Port Number							
	✓ Prompt when switching servers							
	OK Cancel Apply							

The **IP Address of Primary Server** info was designed to add another level of convenience for mobile notebook users that often work both in-office and out-of-office. While working in-office the user can connect via TCP using the full computer name of the OfficeCalendar Server, and while working out-of-office the user can sync to the OfficeCalendar Server over the Internet using the IP address or DNS name of the OfficeCalendar Server (see the topic "*Synchronizing Microsoft Outlook Data from Remote Users Using OfficeCalendar*" on *page 67* for more information). When using Outlook, OfficeCalendar will always try to connect to the OfficeCalendar Server with the settings it last connected with. If it can't connect it then moves to next settings and tries to connect until it finds a way to successfully connect with OfficeCalendar Server or times out.

The User Details Tab

The **User Details** tab, found in the **Configure OfficeCalendar** dialog box, shows when the last OfficeCalendar synchronization (**Last synchronization**) was performed by the OfficeCalendar Client software, as well as who current user (**Current user**) login is set to.

A **Reset User** button is also included in the **User Details** tab, which simply resets the saved user login information.

🐱 Configure OfficeCalendar

The About Tab

The **About** tab, found in the **Configure OfficeCalendar** dialog box, contains version information and the release date of the OfficeCalendar Client software.

Synchronizing Microsoft Outlook Data from Remote Users Using OfficeCalendar

OfficeCalendar is designed from the ground up using Microsoft's .NET architecture. The Microsoft .NET framework for developing applications is optimized for exchanging data over the Internet, and OfficeCalendar is no exception.

With OfficeCalendar you can share Outlook calendar, contact and task information with your co-workers while working remotely over an Internet connection. OfficeCalendar's .NET technology makes it easy for employees working from home, remote offices, or traveling out of town to connect to your office's central OfficeCalendar Server to send and receive updates as often as they like.

You will need to have a dedicated IP address on the computer that runs your OfficeCalendar Server, or you'll need to subscribe to an inexpensive dynamic DNS service like TZO (<u>www.tzo.com</u>), in order to synchronize and share your Outlook calendar, contact and task information over the Internet using OfficeCalendar. If you are interested in configuring TZO to enable OfficeCalendar synchronization over the Internet, refer to the OfficeCalendar Knowledge Base Article "Synchronizing Microsoft Outlook Data from Remote Users Using OfficeCalendar," available online at http://officecalendar.crmdesk.com/answer.aspx?id=4&back=search.aspx.

To synchronize and share your Outlook calendar, contact and task information with your co-workers over the Internet using OfficeCalendar:

- 4. Click on the **Configure OfficeCalendar** icon from within Microsoft Outlook.
- 5. From the **Configure OfficeCalendar** dialog box, click on the **Server Connections** tab.
- 6. Type in the IP address (or dynamic DNS name) of your OfficeCalendar Server in the **IP Address of Primary Server** field (refer to the **Server Connections** tab on *page 63* to determine the appropriate Server Name to use).
- 7. Click **Apply**, and then click **OK** to close the **Configure OfficeCalendar** dialog box.

P	🕫 Configure OfficeCalendar							
	OfficeCalendar Client Configuration Configure connection details and client configuration settings.							
	Sync Settings Server Connections User Details Support About							
	Primary Server	Name	SERVER:	1				
	Port Number		1802					
	IP Address of F	rimary Server	61.28.47.253					
	Port Number		1802					
	✓ Prompt when switching servers							
	OK Cancel Apply							

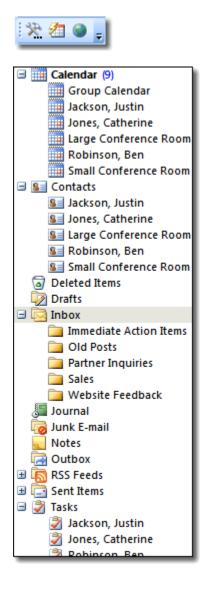

As long as Outlook is open on your computer, it will synchronize with your main office every 15 minutes, or however often your personal **"Automatically synchronize every"** duration preference is set to. You can also get instant updates by clicking on the **Synchronize OfficeCalendar** icon on your Outlook toolbar.

Using OfficeCalendar

Because the OfficeCalendar Outlook add-in Client becomes a part of Microsoft Outlook once it's installed, you continue to use Outlook as you always have. The only differences you'll notice about your Microsoft Outlook is the addition of the OfficeCalendar toolbar and menu option; the addition of your co-worker's shared Outlook Calendar, Contacts and Tasks folders listed directly under your own corresponding Outlook Calendar, Contacts and Tasks folders; and the addition of shared mail folders under your Inbox folder.

Logging into OfficeCalendar from Microsoft Outlook

The first time you open Microsoft Outlook after installing OfficeCalendar:

1. Click on the **Synchronize OfficeCalendar** icon.

2. From the **OfficeCalendar Login** dialog box, enter your assigned **Username** and **Password**.

OfficeCalendar Login				
Username				
Password				
🗆 Save I	_ogin Information			
,				
<u>L</u> ogin	<u>C</u> ancel			

- If you want to save your login information so that you will not have to enter your password each time OfficeCalendar synchronizes, check the Save Login Information check box.
- 4. Click the **Login** button.

Configuring Outlook email folder sharing

OfficeCalendar includes the ability to share your Outlook email folders with other OfficeCalendar users, using Outlook's Send/Receive synchronization process. The **Email Sharing for OfficeCalendar Configuration** dialog contains configuration data about shared email folders and various settings for how OfficeCalendar processes shared Outlook email folder data. From the **Email Sharing for OfficeCalendar Configuration** dialog box you can:

- ✓ View the Microsoft Outlook email folders you are sharing with other Microsoft Outlook users (referred to as **My Shares**).
- ✓ View the Microsoft Outlook email folders others users are sharing with you (referred to as **User Shares**).
- ✓ Edit and/or delete shares with other users.

[&]quot;Sharing Microsoft Outlook Calendar and Contacts without Exchange Server" Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

✓ Modify or change OfficeCalendar email synchronization settings.

To open the **Email Sharing for OfficeCalendar Configuration** dialog box:

1. Click on the OfficeCalendar drop-down menu in your Microsoft Outlook toolbar.

Deleting one or more of your Outlook shares

To delete one of your existing Outlook shares:

- 1. Highlight the user share you wish to delete; and click the **Delete Share** button.
- 2. Follow any further on-screen prompts.

User Shares Tab

The **User Shares** tab allows you to view and/or delete the Microsoft Outlook folders that other users are currently sharing with you (referred to as **User Shares**).

Viewing User Shares

To view your current User Shares:

- 1. Open Microsoft Outlook if it is not already open.
- 2. Click on the OfficeCalendar drop-down menu; and select **Configure** then **Email Sharing**.
- 3. Next; click on the **User Shares** tab.

y Shares User Shares Si			
elect a current share and cli Delete Share	ck		
Email	Folder Name	Folder Path	Status
con con con con	PR Resources Free Webinars	Wersonal Folder: Whitev/Himan Resources Wersonal Folder: Whitev/PR Resources Wersonal Folder: Whitev/Fise Webinars Wersonal Folder: Unitev/Team Articles	Active Active Active Active

Deleting a User Share

To delete a User Share:

- 1. Click on the **User Shares** tab.
- 2. Highlight the User Share you wish to delete; and click on the **Delete Share** button.
- 3. Follow any further on-screen prompts.

Settings Tab

The **Email Sharing for OfficeCalendar Configuration** dialog's **Settings** tab contains the following settings:

- Send Updates
- Maximum size of synchronization email

Turn Off/On automatic updates through Send/Receive

By default, OfficeCalendar is set to send, receive, and process updates for shared Outlook email folders each time you send and receive email from Microsoft Outlook. However you can turn off this automated update function and set OfficeCalendar to only <u>send</u> updates when you manually click on the OfficeCalendar Sync button on the OfficeCalendar toolbar (or if OfficeCalendar is set to automatically synchronize on its own, it will send shared email folder updates upon synchronization).

To turn off automated synchronization of shared Outlook email folder updates using Outlook's Send/Receive function:

- 1. Open Microsoft Outlook if it is not already open.
- 2. Click on the **OfficeCalendar** menu; and select **Configure** followed by **Email Sharing**.
- 3. Click on the **Settings** tab.
- Click on the Send Updates dropdown option; and select only when I click on "Sync" button. Then Close the Email Sharing for OfficeCalendar Configuration dialog box.

Email Sharing for OfficeCalendar Configuration			
My Shares User Shares Settings Support			
Send updates only when I click on "Sync" button during each send/receive Maximum size of stonly when I click on "Sync" button			

Change the maximum size of synchronization emails

OfficeCalendar gathers data from shared Outlook email folders; and attaches the data to specially encoded emails for processing between two or more Outlook installations.

By default, OfficeCalendar will splits this data up into multiple emails so that it will not send any emails that contain an attachment larger than 5MB. This done because many email account providers limit the size of attachments that can be sent or received; and 5MB appears to be the average size limitation. Never-the-less, 5MB is a general average, and some providers will allow larger attachments while others have more stringent size limitations.

If you experience an issue with sending and/or receiving OfficeCalendar synchronization emails to limitations of your emails provider with regards to attachment size; or a user you are sharing an Outlook email folder with is unable to receive your shared folder synchronization data; you can reduce the size of attachments OfficeCalendar will use to send synchronization data.

If you do not experience any issues with emails file size limitation; it is highly recommended that you leave the setting at its default unless instructed to change it by the OfficeCalendar support team.

To change the maximum size of synchronization emails:

- 1. Open Microsoft Outlook if it is not already open.
- 2. Click on the OfficeCalendar menu; and select **Configure** followed by **Email Sharing**.
- 3. Click on the **Settings** tab.
- 4. Set the maximum size of synchronization email attachments using the **Maximum** size of synchronization email toggle box. Then **Close** the **Email Sharing for OfficeCalendar Configuration** dialog box.

Using Outlook email folder sharing

Sharing Outlook email folders via email synchronization

After you add a share, an invitation is sent to the user to accept or reject your Outlook email folder share request. Once an invitation to share an Outlook email folder has been accepted; the status of the share is then updated in the Email Sharing for OfficeCalendar Configuration dialog box to "Active" in either the My Shares tab and/or User Shares tab.

The "Active" status then tells OfficeCalendar to begin the processing of sharing and synchronizing the shared Outlook email folder's data via email, all of which happens behind the scenes without any user intervention (by default).

The processing times for the very first synchronization of a share takes the longest since it gathers all data in the shared folder for processing, and sends it to the person for which you are sharing the data. The time of the synchronization depends on the Outlook email folder you are sharing, and how much data is contained within the folder.

After the first synchronization, however, OfficeCalendar only processes changes that have occurred between the shared email folders since the last synchronization, and thus subsequent shared email folder synchronization processing times are much

"Sharing Microsoft Outlook Calendar and Contacts without Exchange Server"

77 Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

quicker. However, if you are sharing email folders with large attachments this may not be the case.

For most users, Outlook's performance will not be effected as the algorithm for gathering data for synchronization has been designed to be efficient, being mindful the speed at which the processing occurs, while keeping plenty of system resources available for Outlook to continue working as normal while the processing is taking place.

Receiving an invitation to share an Outlook email folder

When an Outlook user shares an Outlook email folder with another user via OfficeCalendar; the user in which you specified to share the email folder with will first receive an invitation to share the selected email folder, and then must accept the invitation and tell OfficeCalendar where they would like the shared email folder will be stored within their Microsoft Outlook folder structure.

Accepting an invitation to share a Microsoft Outlook email folder

1. To accept an invitation to share an Outlook email folder, after carefully reviewing the name and email address of the inviter, click the **Accept** button.

 Next, from the Create New Folder dialog box, select the default location and name for the shared folder <u>or</u> create a custom name and location for the shared folder; and click OK.

Create New Folder	<
Name: Web Referrals	
Folder contains: Mail Items	
Select where to place the folder:	
Personal Folders Calendar F-SE Contacts	
Drafts	
- Ga Outbox ⊕ Ga RSS Feeds ⊕ Ga Sent Items	
OK Cancel	

The Shared Folder Successfully Added dialog will appear; please read it to understand what will happen next...

Shared Folder Successfully Added
Congratulations!
The selected shared folder has been successfully configured.
Important Note: The owner's data will be added upon the next successful send and receive cycle of Email Sharing for OfficeCalendar e-mails between you and the shared folder's owner. Assuming you have rights to add records to the owner's folder, you may do so now.
Don't show this message again Close

Rejecting an invitation to share an Outlook email folder

If you receive an invitation to share an Outlook email folder, be sure to verify the information (Name and Email Address of the Inviter) in the invitation before accepting. If you do not know or recognize the person inviting you to share an

[&]quot;Sharing Microsoft Outlook Calendar and Contacts without Exchange Server" Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. You can later delete the share and re-invite the same user at any time and as often as you wish.

Setting how often you send and receive your Outlook's Shared Calendar, Contact and Task Information

By default, your OfficeCalendar Outlook add-on Client will synchronize with the OfficeCalendar Server to send and receive updated Outlook shared calendar, contact, and task information every 15 minutes. OfficeCalendar allows you to change this setting more or less often if you wish.

To change the frequency of your OfficeCalendar Outlook add-on Client's synchronization:

- 1. Open Microsoft Outlook on your computer.
- 2. Click on the **Configure OfficeCalendar** icon.

3. Click on the **Sync Settings** tab from the **Configure OfficeCalendar** dialog box; enter your desired synchronization duration in the **Automatically synchronize** every field; and click **Apply**, and then click **OK** to exit the **Configure OfficeCalendar** dialog box.

p	🐱 Configure OfficeCalendar 🛛 🛛 🔀					
OfficeCalendar Client Configuration Configure connection details and client configuration settings.						
	Sync Settings Server Connections User Details Support About					
	Connection setting: Online Offline Synchronize my appointments: Yes No

	Automatically synchronize every : 15 minutes					
	Select Group folders and usersSelect					
Synchronize folders at startup 💽 Yes 🔿 No Turn on Notification of Appointments 🔽						
	OK Cancel Apply					

It is not recommended that you set the automatic synchronization time below 15 minutes because the lower value you set in this field will increase the number of requests being made across your local area network, which could potentially cause slower performance of other network applications.

Setting how often you send and receive your Outlook's Shared Email Information

Your OfficeCalendar Outlook add-on Client will synchronize to send and receive updated Outlook shared email information each time your Outlook is set to Send/Receive with your mail server. You can change the time interval that OfficeCalendar shares your email information by changing your Outlook's Send/Receive settings.

To change the frequency of your OfficeCalendar email share by the Outlook Send/Receive settings:

- 1. Open Microsoft Outlook on your computer.
- 2. Click Tools, then Send/Receive.
- 3. From the Send/Receive drop menu, select **Send/Receive Settings** then **Define Send/Receive Groups**.
- 4. In the **Send/Receive Groups** dialog box, change the time interval field in the field **Schedule an automatic send/receive every () minutes**. Then click **Close**.

Selecting Group Calendars and User Folders

The ability to select which group calendars and other user folders you want to synchronize with allows you to control which folders are viewable in your Outlook copy. For example, if you have the rights to be included and can view Group Calendar X, but choose not to view Group Calendar X in your folder list, you may select to not synchronize with this Group Calendar and it will be removed from your folder list. Keep in mind, although you choose to not view Group Calendar X, your Outlook data will still be available to others viewing Group Calendar X.

To select which group calendars and user folders to synchronize in your Outlook folder list:

1. Click on the **Configure OfficeCalendar** icon.

2. Click on the Sync Settings tab from the Configure OfficeCalendar dialog box. Click the Select button next to Select Group folders and users.

P	🛎 Configure OfficeCalendar 🛛 🛛 🚺

5. Click the **Save** button, then **OK** to exit the **Configure OfficeCalendar** dialog box.

By selecting which group calendar folders and other users' Outlook folders you want to synchronize, you can keep your personal Outlook folder list organized and free of unnecessary information. This will not only improve navigation, but increases

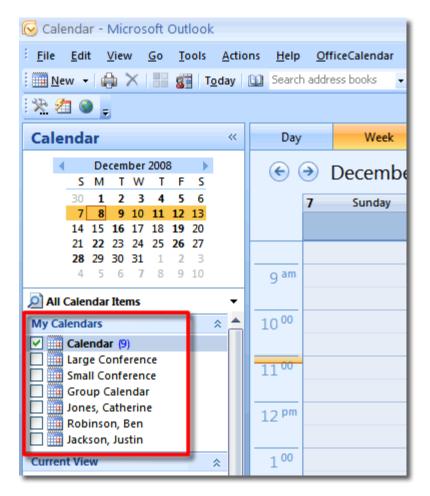

synchronization speed if OfficeCalendar does not have to update all available group calendar folders and other user folders while synchronizing with Microsoft Outlook.

Sharing Microsoft Outlook Calendars with OfficeCalendar

Viewing, entering, editing, and deleting appointments for another user is the same as entering them for yourself when using Outlook with OfficeCalendar.

The key thing to remember when viewing, adding, or editing data for other users you are sharing Outlook calendar data with is that you must navigate to the specified user's Calendar sub-folder. OfficeCalendar will automatically create sub-folders for each of your co-workers under your main Microsoft Outlook Calendar folder as shown in the illustration below.

If one or more of your co-worker's calendar does not appear in your list of Outlook calendars once you have performed a few synchronizations, one of the following scenarios may apply:

"Sharing Microsoft Outlook Calendar and Contacts without Exchange Server"

85 Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

- The user has not executed their first synchronization yet. Each OfficeCalendar users must run at least one synchronization before other user's can see their shared Outlook calendar information.
- The user may have selected to not synchronize their appointments with the OfficeCalendar Server.
- You do not have the minimum "Read" security access to their Outlook calendar. Contact your OfficeCalendar Administrator to inquire about having your security access changed with regards to the user in question.

Appointment Notifications and Tracking History

OfficeCalendar offers the ability to receive appointment notifications within your Outlook window when other users make changes to your Outlook calendar. The appointment notification window only appears after your OfficeCalendar synchronizes and someone has made additions are modifications to your calendar. There are three things that can trigger an appointment notification:

- Someone adds one or more new appointments to your calendar.
- Someone modifies an existing appointment on your calendar.
- Someone deletes an appointment from your calendar.

"Sharing Microsoft Outlook Calendar and Contacts without Exchange Server"

86 Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

If multiple changes or additions are made to your calendar between syncs, all changes are condensed into one notification window.

To turn appointment notifications on or off, see "**Turn on notification of appointments**" (page 63).

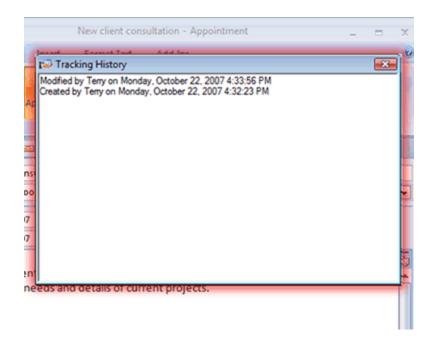

Viewing Appointment Notifications Tracking History

After you close the appointment notifications window, you can go back and view an appointment's tracking history. All changes and modifications to an appointment are logged within each of your appointments for reference.

To view an appointment's tracking history:

- 1. Open the appointment that you would like to view the history for.
- 2. Click the button labeled "History" in the appointment's toolbars area.
- 3. A pop-up window with the appointment's tracking history appears.

Making an Appointment Private

OfficeCalendar gives you the ability to hide the details of your private appointments that you don't want others to see, even for those in which you share your Outlook calendar.

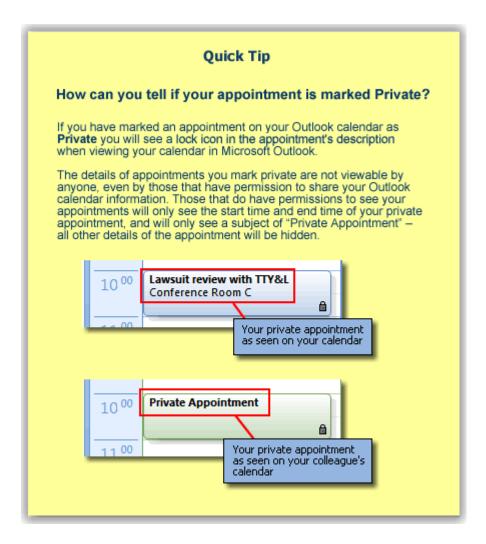

To create a private appointment:

- 1. Create or open the appointment that you want to make private.
- 2. Select the **Private** check box in the **Options** section.

Group Scheduling with OfficeCalendar's Outlook Group Calendars

Once you have performed your first OfficeCalendar synchronization, you'll also notice that extra Calendar sub-folders were created in your Outlook software program called **Group Calendars**. Group calendars are created by your OfficeCalendar administrator, and security rights determine which group calendars will be available to you and what you can do within your associated group calendar folders. OfficeCalendar Outlook group calendars are customized calendar folders that aggregate multiple co-workers' appointments into one calendar. Anytime an appointment is added, edited or deleted to/from one of your co-workers' calendars, it will be updated automatically in all OfficeCalendar Outlook group calendar folders your co-workers are included in upon the next OfficeCalendar synchronization. The same applies for you; if an appointment is added, edited or deleted to/from your Calendar folder or one of your group calendar folders, it will be updated

automatically in any other group calendars you are included in upon the next OfficeCalendar synchronization.

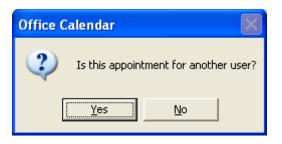

OfficeCalendar's Outlook group calendars are particularly useful when you need to determine two or more people's availability for a particular day and time. When viewing a group calendar, each appointment is identified by the corresponding person the appointment applies to by displaying their name next to the appointment's description (see screenshot below).

All OfficeCalendar group calendars are editable, meaning appointments can be created, edited and deleted to/from group calendar folders. The same security rights assigned to you regarding access to other users' Outlook folders also apply to group calendar folders. With the proper security rights, you can:

 Create appointments in Group Calendar folders. You can create an appointment in a group calendar the same way you would create an appointment in any other Outlook calendar folder. However, upon saving the appointment, Outlook will prompt you with a pop-up message (shown below) asking if the appointment is for another user.

If you select **No**, the appointment will appear in the group calendar with only your name next to the description. If you select **Yes**, the **Select User/s** dialog box will follow, allowing you to select one or more of users and/or resources to associate with the new appointment. If you choose to select other users/resources, the appointment will be added to their individual calendar as well as any other group calendars that your co-workers are included in. Click **OK** after you are finished to exit.

Select User/s for Appointment:						
Select the user/s who will see this appointment appear in their personal calendar.

	OK Cancel					

- Modify appointments in Group Calendar folders. You can also modify appointments in group calendars just as you would any other appointment in Outlook. After an appointment is modified, it is updated in all associated Calendar and group calendar folders.
- **Deleting appointments in Group Calendar folders.** You can also delete appointments in group calendars just as you would any other appointment in Outlook. After an appointment is deleted, it is deleted from all associated Calendar and group calendar folders.

Using Outlook's Built-In "Meeting Request" Feature

If you wish to schedule an appointment for more than one person at a time, use Microsoft Outlook's Meeting Request function.

To create a meeting request in Microsoft Outlook:

- 1. From the **File** pull down menu; select **New** | **Meeting Request**.
- 2. In the **To** field, type in the email address of each person for which you are requesting a meeting. Optionally, you can click the **To** button and select each persons name from your Outlook Address Book if the names of each person you are inviting exist within it.
- 3. Complete the rest of the fields in the **Meeting** dialog box and attach files if necessary, and click Send.

Each person will receive an emailed meeting invitation. Once they've accepted the meeting request, it will automatically be written to their Outlook calendar, which will subsequently update their associated shared Calendar folder in your copy of Microsoft Outlook with the appointment, as well as any associated OfficeCalendar Outlook group calendars upon their next OfficeCalendar synchronization.

Sharing Microsoft Outlook Contacts with OfficeCalendar

Viewing, entering, editing, and deleting contact information for other users is the same as entering them for yourself when using Microsoft Outlook with OfficeCalendar.

The key thing you must remember when viewing, adding, or editing data for other users you are sharing Outlook contact data with is that you must navigate to the specified user's Contacts sub-folder. OfficeCalendar will automatically create subfolders for each of your co-workers under your main Outlook contact folder as shown in the illustration below.

"Sharing Microsoft Outlook Calendar and Contacts without Exchange Server"

92 Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. http://www.officecalendar.com

If one of your co-worker's contact folder does not appear in your list of contact folders in Microsoft Outlook after you have performed your first few synchronizations, one of the following scenarios may apply:

- The user has not executed their first synchronization yet.
- The user may have selected to not synchronize their contacts with the OfficeCalendar Server.
- You do not have the minimum "Read" security access to their Outlook contacts. Contact your OfficeCalendar Administrator to inquire about having your security access changed with regards to the user in question.

Making a Contact Private

OfficeCalendar gives you the ability to hide contacts that you don't want others to see, even for those in which you share Outlook contacts.

To create a private contact:

- 1. Create or open the contact that you want to make private.
- 2. Select the **Private** button in the **Options** section.
- 3. Click Save and Close.

Your private contacts are not viewable by anyone, even by those that have permission to share your Outlook contacts.

Sharing Microsoft Outlook Tasks with OfficeCalendar

While you can view, enter, edit and delete items directly from your co-works shared Outlook Calendar and Contacts folders, sharing Outlook tasks in OfficeCalendar works differently.

In order to create or assign a task to someone else in Outlook using OfficeCalendar, you must use Outlook's built-in **Task Request** feature.

To create or assign a task to someone else:

- 1. Open Microsoft Outlook.
- 2. Click on the **File** drop down menu; select **New** | **Task Request**.

- 3. In the **To** field, type in the email address of each person for which you are making a Task Request. Optionally, you can click the **To** button and select each person's name from your Outlook Address Book if the names of each person you are inviting exist within it.
- Complete the rest of the fields in the Task Request dialog box, attach files if necessary, and click Send.

Each person will be emailed a Task Request. Once accepted, the task (from your task request) will automatically be written to their Outlook task list, and will subsequently update their associated shared task folder in your copy of Microsoft Outlook with task.

The key thing you have remember with shared Outlook tasks while using OfficeCalendar is that tasks for other users can only be created by using the **Task Request** function in Microsoft Outlook. Creating tasks for yourself can be performed as normal.

If one of your co-worker's task list does not appear in your list of task folders in Outlook after you have performed your first few synchronizations, one of the following scenarios may apply:

- The user has not executed their first synchronization yet.
- The user may have selected to not synchronize their tasks with the OfficeCalendar Server.
- You do not have the minimum "Read" security access to their task list. Contact your OfficeCalendar Administrator to inquire about having your security access changed with regards to the user in question.

Creating Private Tasks

OfficeCalendar gives you the ability to hide tasks that you don't want others to see, even for those in which you share Outlook tasks.

To create a private task:

- 1. Create or open the task that you want to make private.
- 2. Select the **Private** check box in the lower right corner.
- 3. Click Save and Close.

Your private tasks are not viewable by anyone, even by those that have permission to share your Outlook tasks.

[&]quot;Sharing Microsoft Outlook Calendar and Contacts without Exchange Server" Copyright Lookout Software, LLC 2003 – 2009. All rights reserved. Microsoft, Outlook, and Exchange Server are trademarks or registered trademarks of Microsoft Corporation. Last update February 2, 2009. <u>http://www.officecalendar.com</u>

Working Offline

OfficeCalendar was specifically designed to allow laptop users to disconnect from the home office's computer network, and to continue use Microsoft Outlook while at home or on the road while working offline. Any changes made by the offline user to his/her own Outlook calendar, contacts and/or tasks; as well as other user's calendars, contacts and/or tasks will get updated as soon as the user re-connects with the office network, and runs the OfficeCalendar synchronization. Optionally, the offline user can synchronize their Outlook changes over the Internet. Refer to the topic "Synchronizing Microsoft Outlook Data from Remote Users Using OfficeCalendar" on page 67 for more details.

Upon opening Microsoft Outlook on your computer while it is disconnected from your office's network, the **OfficeCalendar could not be reached** dialog box will appear once it tries to synchronize with the OfficeCalendar Server. To work offline, choose **Work Offline**. This will disable OfficeCalendar synchronization until it is re-enabled (switched back to **Online** mode).

When users turn their connection setting to Offline, the Synchronize OfficeCalendar Icon will turn to a red "X" icon to notify users that they are working offline and not synchronizing their Outlook information to the OfficeCalendar Server.

When you come back into your office, and connect to your office's network, you will want to switch back to **Online** mode. Switching to **Online** mode and running the synchronization will update all of the changes you have made to your co-workers calendar, contacts, and tasks, as well as all of the changes they have made to your Outlook calendar, contact and task information.

To re-enable OfficeCalendar to work online:

- 1. Open Microsoft Outlook.
- 2. Click on the **Configure OfficeCalendar** icon on the Microsoft Outlook toolbar.

3. From the **Sync Settings** tab click the **Work Online** radio button.

P	🐱 Configure OfficeCalendar							
		lient Configuratio on details and client		figuration s	ettings.			
	Sync Settings	erver Connections	Use	r Details 🛛 🤅	Support Abo			
	Connection setti	ng:	0	i Online	C Offline			
	Synchronize my a	appointments:	(• Yes	C No			

4. Click **Apply** to re-enable OfficeCalendar to work online, and then click **OK** to close **Configure OfficeCalendar** dialog box.

You will now be able to update your copy of Microsoft Outlook with your co-worker's Outlook calendar, contact, and task information, and update the OfficeCalendar Server with changes you made to Outlook since your last online work session.

Accessing your Outlook Calendars, Contacts and Tasks with OfficeCalendar Online

Once you have performed your first OfficeCalendar Online synchronization, you can access your Outlook calendars, contacts and tasks via the web using your organization's OfficeCalendar Online account. Although the login URL for your organization's OfficeCalendar Online is the same for all users in your organization, user login credentials are unique to each user. To log in to OfficeCalendar Online and see your personal and shared Outlook calendars, contacts and tasks, you will use your OfficeCalendar user name and password (the same login you used to synchronize OfficeCalendar).

1. Open your web browser, and type in the unique OfficeCalendar Online URL created for your organization. If you aren't familiar with this URL, contact your OfficeCalendar account administrator; the login URL can be found under the **OfficeCalendar Online** tab in the OfficeCalendar Administration Console.

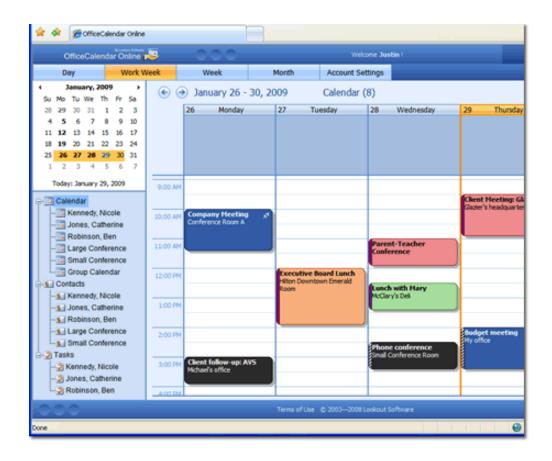

2. Type in your OfficeCalendar user name and password that is unique to your OfficeCalendar user account.

3. Once you have logged in, you can begin viewing your personal and shared Outlook calendar, contact and task folders via the web. The Outlook information shown in each calendar, contact and task folder will be as recent as your last synchronization to OfficeCalendar Online through the OfficeCalendar toolbar in Outlook. (Note: Calendar information will be available for all future and recurring appointments, and for past appointments up to 30 days prior to the current date.)

Using OfficeCalendar Online

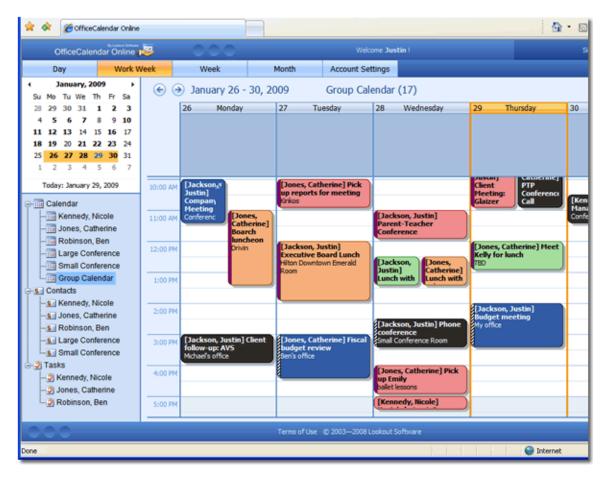

Once you have logged into your OfficeCalendar Online account, there are several things you can do from here. Most importantly, you can view not only your personal and shared Outlook calendar, but you can also view your personal and shared Outlook contact and task folders.

OfficeCalendar Online also offers several views for your Outlook folders. You can see your calendars by Day, Work Week, Week and Month views, and navigation from date range to date range is as easy as if you were using Outlook.

Day Work Week Wonth Account Settings Su Mo Tu We Tu Tu <td< th=""><th></th></td<>	
Su Mo Tu We Th Fr Sa 28 29 30 31 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 24 24 24 24 24 25 26 27 28 29 30 31

1 2 3 4 5 6 7	
Today: January 29, 2009 9:00 AM	

Accessing your Outlook folder list is simple. Just click on the calendar, contact or task folder you would like to view and information in that folder will appear in your browser.

Also, your Outlook contact folders can be filtered alphabetically while viewing your shared contact information.

The **Account Settings** tab in your OfficeCalendar Online account is used to set your time zone information, Daylight Savings Time preference, date and time formats, item counts per page, and personal default views for when you first sign in to OfficeCalendar Online.

You can also assign unique color categories for your Calendar folder appointments in the Account Settings tab. OfficeCalendar Online will automatically sync all default Outlook calendar colors, but if you have changed the color assignments in your Outlook you will need to assign them under the Account Settings tab as well so the corresponding color will appear in your OfficeCalendar Online Calendar.

Advanced OfficeCalendar Installation for Larger Groups

Lookout Software has made several advanced configuration options available to meet the specialized needs of larger OfficeCalendar installations (50+ users). These options currently include the configuration of OfficeCalendar to use Microsoft's SQL Server as a database store, and the configuration of an Internet Free/Busy Service for Microsoft Outlook/OfficeCalendar clients. Support for these features from Lookout Software is limited, and Lookout Software assumes that end users wishing to implement these advanced features will have a general knowledge and understanding of the technologies involved. Also, the implementation of these advanced features require certain operating systems and software licenses which are not included or offered by Lookout Software as a part of the OfficeCalendar license. Refer to each specified configuration option below to determine what is required.

Configuring OfficeCalendar to work with Microsoft® SQL Server

OfficeCalendar can now be configured to use Microsoft SQL Server as its database store. However, there are no advantages to using OfficeCalendar with SQL Server unless your installation has more than 50 physical users. In fact, small installations that use OfficeCalendar with Microsoft SQL Server will likely see a significant decrease in OfficeCalendar's performance.

Larger OfficeCalendar installations (50+users) may well see greater performance in using SQL Server with OfficeCalendar. Also, those customers that have standardized on Microsoft SQL Server as their company's primary database platform are likely to have special hardware, software, and IT procedures to help them get more from their OfficeCalendar investment.

**NOTE: In order to use Microsoft SQL Server as your OfficeCalendar data store, you must supply your own Server and Client database licenses. Microsoft SQL Server and Client licenses are <u>not</u> included or offered by Lookout Software as a part of the OfficeCalendar license.

Things you should know before you configure OfficeCalendar to work with SQL Server

 In order to configure OfficeCalendar to work with Microsoft SQL Server basic knowledge and understanding of SQL Server is required. If you do not have a basic level of SQL Server knowledge, we highly recommend that you consult with someone who does. In particular, you will need to know how to create a blank SQL Server Database and you will need to know how log into you SQL Server Database. Lookout Software does not offer training and/or consulting services in these areas of knowledge.

- OfficeCalendar should not be used with SQL Server with installations that have fewer than 50 employees unless they are advised to do so by the Lookout Software support department.
- Data migration from Access to SQL Server is currently not offered. Thus, to run OfficeCalendar connected to a SQL Server you will be starting from a new database and will need to set up all users, resources, employee groups, security settings, group calendars, and group calendar settings from scratch.
- If your SQL Server installation is on a separate computer from your OfficeCalendar Server you will need to open port 1433 on the SQL Server computer in order for the OfficeCalendar Server application to send and receive data to the SQL Server.
- You can NOT use OfficeCalendar to connect to a existing SQL Server Database that is used for other applications. During the OfficeCalendar Server's setup all contents of a SQL Server Database will be overwritten, and thus all existing data would be deleted.

How to configure the OfficeCalendar Server to work with a SQL Server Database

1. Create a blank SQL Server Database.

*Note: We recommend that you name the SQL Server Database "*OfficeCalendar"* for simplicity.

- 2. Open the **OfficeCalendar Administration Console**, and click on the **Configuration** tab.
- 3. From the **Database type** group box, select the **SQL Server** option radio button.

 Next, from the SQL Server group box, type in the name of your SQL Server (in the SQL Server text box) and type in the name of the database you created in Step 1 (in the Database text box).

🕫 OfficeCalendar on

Using OfficeCalendar's Internet Free/Busy Server for Microsoft Outlook

Internet Free/Busy (IFB) is a feature of Microsoft Outlook that allows you to see when others are free or busy so that you can efficiently schedule meetings. Outlook users have the option to publish their free/busy information to a user-specified Uniform Resource Locator (URL) file server. You can share this URL file server with all users or limit it to a specific set of users.

Lookout Software developed a new feature set in the OfficeCalendar Administration Console that allows OfficeCalendar customers to create a Microsoft Outlook Internet Free/Busy Server. This feature also automates the configuration of publishing and retrieval of Free/Busy files for all Microsoft Outlook clients that utilize OfficeCalendar.

In summary, here is how the process works:

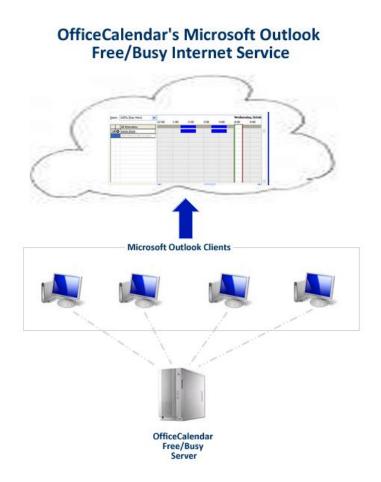

Initial Setup and Configuration

First, OfficeCalendar's Administration Console automates the configuration of a URLbased file server (utilizing Microsoft IIS with FTP) to act as a Free/Busy Server that allows the publishing and retrieval of Free/Busy files from Microsoft Outlook clients with a few simple mouse clicks. At the same time, the OfficeCalendar Server creates a configuration file for each OfficeCalendar user which, upon each user's next synchronization, configures each user's Microsoft Outlook Free/Busy options with the appropriate Free/Busy *publishing* and *search* locations.

Outlook Automatically Publishes and Retrieves Free/Busy Information

Each OfficeCalendar user's Outlook client then publishes their Free/Busy data, and retrieves other OfficeCalendar user's Free/Busy data on a regular basis (this is very similar to how each OfficeCalendar client automatically synchronizes with the OfficeCalendar Server). OfficeCalendar users then utilize Microsoft Outlook's built-in *Scheduling* viewer (shows selected Attendees Free/Busy time) to determine appropriate time slots for scheduling a meeting when using Outlook's Meeting Request feature.

Things you should know before using OfficeCalendar's Internet Free/Busy Server for Microsoft Outlook

- OfficeCalendar's Microsoft Outlook Free/Busy Server must be installed on the same computer in which your OfficeCalendar Server is installed.
- The computer in which your OfficeCalendar Server is installed must have Microsoft Internet Information Services 5.0 or higher (IIS) and FTP services installed.
- An exception for Port 21 must be enabled on your OfficeCalendar Server computer's firewall in order for OfficeCalendar's Free/Busy Server to work. This is the default port for FTP services.
- Lookout Software assumes that those customers who wish to use OfficeCalendar's Microsoft Outlook Free/Busy Server possess a basic knowledge and understanding of Microsoft IIS 5.0+, FTP, Web Servers, and Network Permissions. The applications/services above are developed by Microsoft Corporation, and Lookout Software does not provide training, consulting or

support for them. Please contact your system administrator, local computer networking consultant or Microsoft Corporation should you require general setup, configuration or troubleshooting advice and support for them.

 ALERT for installations with Outlook XP Users - Outlook XP can not properly store usernames and passwords in order to pass them to an FTP Server for authentication. The only consistent way to make this work that OfficeCalendar developers have found for this problem involves changing the Windows registry of your server computer to allow users to log into it with a blank password. WE DO NOT RECOMMEND THAT YOU USE THIS OPTION AS IT POSES A SEVERE SECURITY RISK TO YOUR SERVER COMPUTER. However, this option is available assuming you understand and are willing to assume this risk. If you do not wish to assume this risk, then it is recommended that you either upgrade all of users to a newer version of Microsoft Outlook (Outlook 2003 or higher) and resume your setup of the OfficeCalendar Free/Busy Server once that is completed; or simply abandon the setup of OfficeCalendar's Free/Busy Server all together.

How to Setup OfficeCalendar's Internet Free/Busy Server

- 1. From the computer in which the OfficeCalendar Server is installed, ensure that Microsoft Internet Information Services (IIS) version 5.0 or higher and FTP Publishing are installed and started and both services are started.
- 2. Open the OfficeCalendar Administration Console, and click on the **Free/Busy** tab.

🕫 OfficeCalendar on	
By Lookout Software	Administration Con
Accounts/Security User Groups Group Calendars Configuration	Free/Busy Bupport Offic
State Free/Busy is not configured	

3. In the **FTP Folder Name** field; type in the name of the FTP folder you wish OfficeCalendar to create. OfficeCalendar has default name of **OfCalFreeBusy** in this field. It is highly recommended that you use this default name.

🕫 OfficeCalendar on

Free/Busy Settings			
State Free/Busy is not configured			
Server Name			
FTP Folder Name OfCalFreeBusy			
Folder Path C:\Inetpub\ftproot\OfCalFreeBusy			

4. In the Folder Path field, set the path to your *ftproot* folder. OfficeCalendar applies a default path of C:\Inetpub\ftproot\OfCalFreeBusy for the Folder Path field. Assuming you have installed Microsoft IIS and FTP Services with their default configurations, there should be no need to change the path. Again, we highly recommend using OfficeCalendar's default settings when possible.

OfficeCalendar's Free/Busy Configuration for Microsoft Outlook Clients

1. Once the OfficeCalendar Free/Busy Server has been setup and turned by an OfficeCalendar administrator, each OfficeCalendar user will see the follow message within Microsoft Outlook upon their next synchronization with the OfficeCalendar Server...

OfficeCalendar 🛛 🛛
The OfficeCalendar Administrator has made changes to the OfficeCalendar Server installation that affect this OfficeCalendar Client. In order for these changes to take effect, Outlook on this computer must be exited and restarted.
Click OK to Exit and Restart Outlook, or click Cancel to Exit and Restart later.
OK Cancel

Once Outlook is restarted, the Outlook client is fully configured to send and received Internet Free/Busy files. Please note, it may take several hours before all user data is visible as all users must go through this process before their Free/Busy data is published and retrieved by others.

2. If a user wishes, they can set the number of month(s) of calendar free/busy information in which they publish for others to see, and set how often free/busy information is updated within their Outlook. To access these settings:

- a. Open Microsoft Outlook.
- b. From the **Tools** menu; click **Options**.
- c. From the *Options* dialog box; click the **Calendar Options** button.
- d. From the *Calendar Options* dialog box; click on the **Free/Busy Options** button.
- e. From the *Free/Busy Options* dialog box; locate the Options group settings and change them to preference, and click **OK**.

Free/Bu	Options	X
Options		_
	ree/busy information is used by people sending meeting requests, to determine when ou are available for meetings.	
_	ublish 12 month(s) of Calendar free/busy information on the server

	earch location: ftp://ofcaluser:238752917488029427@L/ R/OfCalFreeBusy/%na	эг
	OK Cancel	

How to Plan a Meeting Using Internet Free/Busy Information

- 1. In the Calendar folder, click **New Meeting Request** on the **Actions** menu.
- 2. On the **Scheduling** tab, type the name of each attendee in the **All Attendees** box. Outlook follows the URL path (as previously specified) for the individuals that you invite and automatically inserts their free/busy information in the planner.

Outlook publishes and retrieves free/busy information every 15 minutes by default. You can manually override this time increment by pointing to **Send And Receive** on the **Tools** menu, and then clicking **Free/Busy Information**. This updates the free/busy information immediately.

Purchasing OfficeCalendar licenses

OfficeCalendar is a highly affordable and easy-to-use alternative to Microsoft Exchange Server for sharing Outlook calendar, contact, and task information. For pricing and/or to purchase OfficeCalendar software licenses, visit our website at http://www.officecalendar.com/purchase/purchase.aspx, or call/email us at:

866-847-7512 (toll free) 214-329-4500 (direct dial) sales@officecalendar.com

Getting Help with OfficeCalendar

If the OfficeCalendar Server cannot connect to your network once OfficeCalendar tries to synchronize, the **OfficeCalendar could not be reached** dialog box will appear.

Click **Troubleshoot** to scan and test the connection between the OfficeCalendar Client and Server.
