

What's New in OfficeCalendar Version 6.5.0.0

Wireless BlackBerry Sync

OfficeCalendar Mobile for BlackBerry gives you total freedom to move about freely...allowing you to send and receive calendar, contact and task folder updates wirelessly (Over-the-Air).

All you need is an OfficeCalendar Online Account and the OfficeCalendar Mobile for BlackBerry application installed on your BlackBerry device.

For complete details refer visit the official [OfficeCalendar Mobile for BlackBerry page](#) on our website.

Added Support for Apple Macintosh Users

Have a user with an Apple Macintosh computer you'd like to share Outlook calendar, contact and task information with? OfficeCalendar online now supports Firefox web browsers for both Apple Macintosh and Windows platforms.

Private Appointments are now available in OfficeCalendar Online and on the BlackBerry

OfficeCalendar Version 6 now synchronizes private appointments created from Outlook to OfficeCalendar Online (and to the BlackBerry as well with OfficeCalendar Mobile for BlackBerry).

With OfficeCalendar Version 6.5 you'll also find that:

- Private appointments created online and will sync to both your Microsoft Outlook and BlackBerry calendar folders.
- Private Appointments created on BlackBerry will sync to your OfficeCalendar Online and Outlook calendar folder when using OfficeCalendar Mobile for BlackBerry.

Note: Items marked as private will only appear to the owner of the items and not other users.
